

Fictional already-scored instrument summary

Entirely synthetic input document for Clarity POC testing

Reporter	adolescent, mother, father, and teacher
Setting	school
Source type	instrument_export

Important notice

These fictional scales and synthetic values exist only for software testing. They contain no proprietary items and cannot support a real diagnosis.

SYAP profiles

Adolescent attention index T=71; mother T=58; father T=68; teacher T=73. Activity/impulse indices range T=49-56. Validity indicators were supplied as acceptable.

SSFI teacher export

Independent task completion T=74 and materials management T=70. Supplied interpretation: marked school-function concern, to be integrated with interview, developmental history, other settings, and differential assessment.
